**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1,3,4, are rejected under 35 U.S.C. 102(e) as being anticipated by Mirelman'588.

The applied reference discloses *Allium sativum* chemically or physically bound to cellulose. See column 2, lines 35-45, column 3, lines 25-30, 42-60, column 4, lines 35-67.

The method of Mirelman'588 would have the same effect of protecting cellulosic material.

*Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2,5-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mirelman'588.

The Mirelman'588 teaches that it is known in the art to bond cellulose with Allium sativum as in the above rejection. The applied reference does not teach that other cellulose containing materials such as lumber or plants and nonporous surfaces may be treated with garlic extract. The applied reference does not teach effective amounts of extract.

However, it would have been obvious to one having ordinary skill in the art at the time of the invention to apply garlic extract to any material containing cellulose, since such would have benefit of preventing the growth of mold and mildew because of well known garlic properties of preventing growth of bacteria. Also, it would have been obvious for the same reason to apply

such extract to other surfaces. It would have been obvious to vary the amounts of garlic extract to achieve the result of preventing growth of bacteria. Also, it would have been obvious to select the method of applying such extract to particular surface since such involves only routine skill in the art.
